

In Reference to RM-10868,

This proposal to is WITHOUT MERIT and should be dismissed without action.

There is no valid reason to retain this requirement for licensing and testing for this one class of license.

Retaining the 5WPM testing requirement places unnecessary requirements upon the FCC, VEC and the testing applicant that has no bearing on the technical aspects of the hobby.

My comments are to adopt all aspects of this petition except the retention of the 5WPM requirement.
